Art Unit: 2436

DETAILED ACTION

1. This action is in response to the communication 10/09/2009. Claims 1 – 91 are currently pending. Claims 36 – 68, 80 – 87 have been cancelled. Claims 1 – 35, 69 – 79 and 88 – 91 have been examined.

Response to Arguments

2. Applicant's arguments with respect to prior art rejection of claims 1 – 35 have been fully considered but they are not persuasive. Applicant primarily argues the references, even when combined do not teach “automatically identifying new signatures to use in identifying previously unknown intrusive network attack” and “reduce said collection to a reduced data collection to reduce said data collection”. Examiner disagrees and directs the Applicant's attention to “detecting new vulnerabilities and implementing the signature of the new vulnerabilities (TEAL) and “event classification and processing/analyzing of sub/several events (Hrabik et al)” correspond to the claimed subject matter as detailed in the previous office action. Examiner maintains previous Examiner's prior art rejection (mailed 8/12/2009) for Claim 1 and all of the dependent claims of 1, by the virtue of their dependency and requests to amend the Independent claim 1 similar to the allowed subject matter that is detailed in item **#5**.

Additionally, please refer to item **#4** for obviousness-type double patenting rejection.

3. Applicant's arguments with respect to the rejection(s) of claim(s) 69 – 79 and 81 – 91 under prior art rejection have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. Please refer to item **#5**. However, upon further consideration, a new ground(s) of rejection is made in view of obviousness-type double patenting rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1 – 35, 69 – 79 and 88 – 91 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over

- a. claims 1 – 7, 9 – 20 and 22 – 26 of copending application 11/271,133,
- b. claims 1 – 20 of Patent 7,535,909.

Although the conflicting claims are not identical, they are not patentably distinct from each other because claims of instant application are analogous to or an obvious variation of:

The claims of the copending applications and of the patent contain every element of claims 1 – 35, 69 – 79 and 88 – 91 of the instant application and thus anticipate the claims of the instant application. Claims 1 – 35, 69 – 79 and 88 – 91 of the instant application therefore are not patentably distinct from the copending application claims and as such are unpatentable for obvious-type double patenting. A later patent/application claim is not patentably distinct from an earlier claim if the later claim is anticipated by the earlier claim. Furthermore, there is no

Art Unit: 2436

apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Claims of the instant application are anticipated by patent claims in that the patent claims contains all the limitations of the instant application. Claims of the instant application therefore is not patentably distinct from the earlier patent claims and as such are unpatentable for obvious-type double patenting (*In re Goodman (CAFC) 29 USPQ2d 2010 (12/3/1993)*).

Allowable Subject Matter

5. Claims 1 – 35, 69 – 79 and 88 – 91 are allowed. Examiner suggests filing the Terminal Disclaimer to overcome the obviousness-type double patenting rejection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

Examiner’s Note: Please not the change in Examiner with this application.

The prior art made of record and not relied upon is considered pertinent to applicant’s disclosure. See PTO Form 892.

Applicant is urged to consider the references. However, the references should be evaluated by what they suggest to one versed in the art, rather than by their specific disclosure. If applicants are aware of any better prior art than those are cited, they are required to bring the prior art to the attention of the examiner.
